PAPERS IN CONNE TI N WITH THE BUBONIC PLAGUE.

Notification, dated 2nd March 1899.

It is hereby notified for the information of the public that the Senior Surgeon and Sanitary Commissioner with the Government of Mysore has authorized M. Perumal Naidu, 1st Class Hospital Assistant at Channapatna, to inoculate and grant certificates of inoculation within his jurisdiction.

WEEKLY REPORT OF PLAGUE IN THE MYSORE STATE, EXCLUDING THE CIVIL AND MILITARY STATION, FOR THE WEEK ENDING 3RD MARCH 1899.

Bangalore City.

I. The following are the figures in the City up to date :—

	Plague cases.	Plague deaths.	Deaths from all causes.	Normal recorded mortality in the same period.
From 12th August 1898 to 3rd February 1899 ..	3,324	2,648	6,983	612
Week ending 10th February 1899	5	2	35	32
Week ending 17th February 1899	1	1	27	32
Week ending 24th February 1899	1	Nil	31	32
Week ending 3rd March 1899	1	1	35	31

The number of attacks has been only 1 during each of the past three weeks, and if the present steady rate of decrease should continue, it cannot be long before the City is declared free. The one attack and one death reported during the week, occurred on the 25th and related to a dead body found near the Sampangi tank bund.

A passenger suffering from plague, travelling from the City, was discovered at the Cantonment Station on the evening of the 3rd March and the matter is under enquiry. The person is reported to have come from Krishnagiri, Salem district, a fortnight ago and purchased a ticket at the City Station after getting himself disinfected there.

There were 1,651 arrivals in the City during the week against 1,852 during the previous week.

II. The figures for the Health and Segregation Camps were as follows :—

	Remaining.	Admitted.	Discharged.	Developed plague.	Remaining.
Health Camps ..	312	1	39	..	274
Segregation Camp ..	..	8	6	..	2

III. During the week, there were 547 first inoculations and no second inoculations, bringing the totals to 31,705 and 1,356, respectively. There were no attacks among inoculated persons during the week.

IV. The Hospital figures were as follows :—

	Remaining.	Admitted.	Discharged.	Died.	Remaining.
For the week	2	..	1	..	1
Since commencement	..	2,095	741	1,353	1
Inoculates	..	105	65	40	..

V. During the week, 263 houses were disinfected as against 305 during the previous week, of which 45 were plague-infected houses and the rest deserted ones.

VI. During the week, permission was given to reoccupy 202 houses ; no charge was levied for disinfecting 41 houses ; 5 were disinfected by the owners themselves, and the charges collected from the remaining 156 amounted to Rs. 242-8-0.

VII. The cost of earthworks carried out during the week in the Malleswara and Basawanagudi extensions in the north and south of the City was Rs. 2,160, bringing the total amount spent up to date to Rs. 32,871.

From the commencement up to date 600 infected houses have been marked for demolition, of which 390 have been pulled down at a cost of Rs. 1,560. In addition to these, 893 houses have been marked for removal for the opening out of lanes in the City, of which 590 have been acquired by the Sanitary Department at a cost of Rs. 38,723.

Independently of the above, the Bangalore City Municipality demolished 12 houses as unfit for human habitation during the week, the total number demolished by the municipality from the commencement being 412.

The length of pipes laid out for water-supply in the Mallesvaram Extension from the commencement was 2,690 running feet and the number of fountains put up was 7.

VIII. During the week under report, 791 persons or a daily average of 113 were disinfected with their effects at the City Railway Station.

Mysore State, outside Bangalore.

IX. The accompanying weekly return shows the state of the epidemic in the Province.

The decrease noticed in the four affected districts of Bangalore, Kolar, Tumkur and Mysore in the last week's report, continued during the present week.

In the Bangalore district the number of cases decreased from 115 to 91. In the sub-taluk of Closepet, and the taluks of Hoskote and Channapatna, in which an increase was noticed in the previous week, the number of attacks decreased from 10, 12 and 18 to 5, 9 and 10, respectively. There was slight increase in the taluks of Bangalore, Dodballapur and Devanhalli, but a decrease in all the other taluks. In Magadi taluk there were no attacks during the week. The total number of infected villages increased from 55 to 59 ; but cases were reported from only 39 as against 41 villages. Of these, 8 were newly infected villages.

In the Kolar district, excluding the Gold Fields, the number of indigenous cases decreased from 34 in the past week to 18 during the present week, while in the Gold Fields it increased from 32 to 23. The number of infected villages in the Gold Fields increased from 10 to 15, while in the Kolar district, excepting Gold Fields, it decreased from 20 to 16.

In the Tumkur town there was no attack or death during the week, and the disease was confined to Tumkur Taluk, where th attacks decreased from 13 to 11 but the number of infected villages was increased by 1. Out of the 76 villages in the district from which plague cases have been reported from commencement, only 11 are now infected, and it may therefore be hoped that this district will soon be entirely free from plague.

In the Mysore district, excluding Mysore City, the number of indigenous cases as well as the number of infected villages remained almost stationary, the figures for the week being 32 and 11, as against 31 and 12, respectively.

X. In the Mysore City, the figures were as follows :—

	Plague cases.	Plague deaths.	Total mortality.
Week ending 10th Feb. 1899 ..	285	231	283
,, 17th Feb. ,, ..	282	249	300
,, 24th Feb. ,, ..	264	204	255
,, 3rd March ,, ..	194	186	253

The decrease in plague cases, deaths and total mortality noticed in previous weeks was well maintained during the present week.

Extract from the Diary of the District Plague Officer, Bangalore district, for the week ending 3rd March 1899.

* * * * * *

There is nothing particular to note this week beyond the steady and gradual decrease of the plague generally.

Extract from the Diary of the Special Plague Officer, Kolar Gold Fields, dated 7th March 1899.

* * * * * *

Coolies are coming in for the past few days. There is no panic. Those who intend leaving will do so with the object of seeing their families who left this at the beginning of the epidemic.

Extract from the Diary of the District Plague Officer, Mysore, for the week ending 3rd March 1899.

Only one village, *viz.*, Hosur in the Seringapatam taluk, was newly infected during the week. It has been promptly evacuated, the patients camping out on one side and the healthy on the opposite side of the village. The usual precautions have been taken. I have had to warn the people against overcrowding in the sheds and to advise them to leave at least two openings for a shed with 2 or more sky-lights on the roof to admit of free perflation of air. The cause of infection in Hosur is traced to the villagers visiting the Ganjam camp for purposes of trade. * * *

2. I closely inspected the Ganjam town on more than one occasion during the week. Some people still continue to live in the houses notwithstanding advice to the contrary, most people in the camp visit their houses. The roofs of most houses were uncovered to a large extent during the week, and several families sent to camp. * * * * *

3. There have been no cases in Seringapatam; but one girl (age 12) died on the 3rd instant after 3 days' fever. The Sub-Assistant Surgeon and the midwife who examined the body did not detect any special signs of plague. Still the usual precautions have been taken. The roof of the house has been opened out, the neighbouring shop-keepers have closed shops, and the lane in which the death occurred is being evacuated.

4. In Siddalingapur I told the villagers that they may prepare themselves to return to their houses after disinfection, as the only case that occurred there was promptly isolated. But the villagers preferred to be in camp; they remarked humorously that their present condition put them out of their power to receive visitors from Mysore.

* * * * *

6. The Amildar of T. Narsipur reported that two rats were found dead in the totti of one Venkata Rao's house at T. Narsipur, that they were sent to the Bacteriologist for opinion, and that disinfection, evacuation and other measures were taken. Necessary instructions to watch the locality have been given.

7. Amildars have been asked to advise villagers to secure hutting materials beforehand against the coming wet, weather when camping out would be more difficult; and the sheds will have to be more substantial. The richer of the villagers may put up substantial tiled sheds in their own fields which will be useful to them on occasions other than the present

Extract from the Diary of the District Plague Officer, Tumkur, for the week ending 3rd March 1899.

* * * *

Inspected Kora.—One new case only since evacuation. Inspected houses had been disinfected. A census of the village was taken and compared with the Khaneshumari accounts of the shanbhog. It was found that no families had left the village. Made enquiries as to friends or relatives of infected families living in healthy areas, and sent word to the patels of the villages where these lived to prevent them having intercourse with Kora. Heard that a daughter of one of the patients living in another village had visited her mother several times. Sent men to that village, had the daughter's house disinfected and ordered the patel to keep the daughter under observation.

No fresh attack in Tumkur town since 19th February. Disinfection proceeding and arrangements made for disinfection of persons and effects of those returning to the town.

Plague in the Tumkur taluk is sporadic and declining, and the District Plague Officer hopes that it will cease in a fortnight.

Extract from the Diary of the District Plague Officer, Bangalore district, for the week ending 10th March 1899.

* * * *

I visited several villages in the Bangalore taluk during the week, most of which have been re-occupied, the houses having been whitewashed and the village generally cleaned up. New windows have been opened in most of the houses also.

The people are willing to do the work themselves, and seem to realize the necessity of getting it well done; for they understand, I think, that if plague were to break out again during the rains, they would be put to much trouble and inconvenience.

V. P. MADHAVA RAO, *Plague Comr. in Mysore.*
